ID ITIL4AMCS **Price** 1,625.— €(excl. VAT) **Duration** 2 days

Prerequisites

There are no prerequisites to attend the ITIL 4 Acquiring & Managing Cloud Services training. The relevant key concepts from the ITIL 4 framework are covered in the training.

Course Content

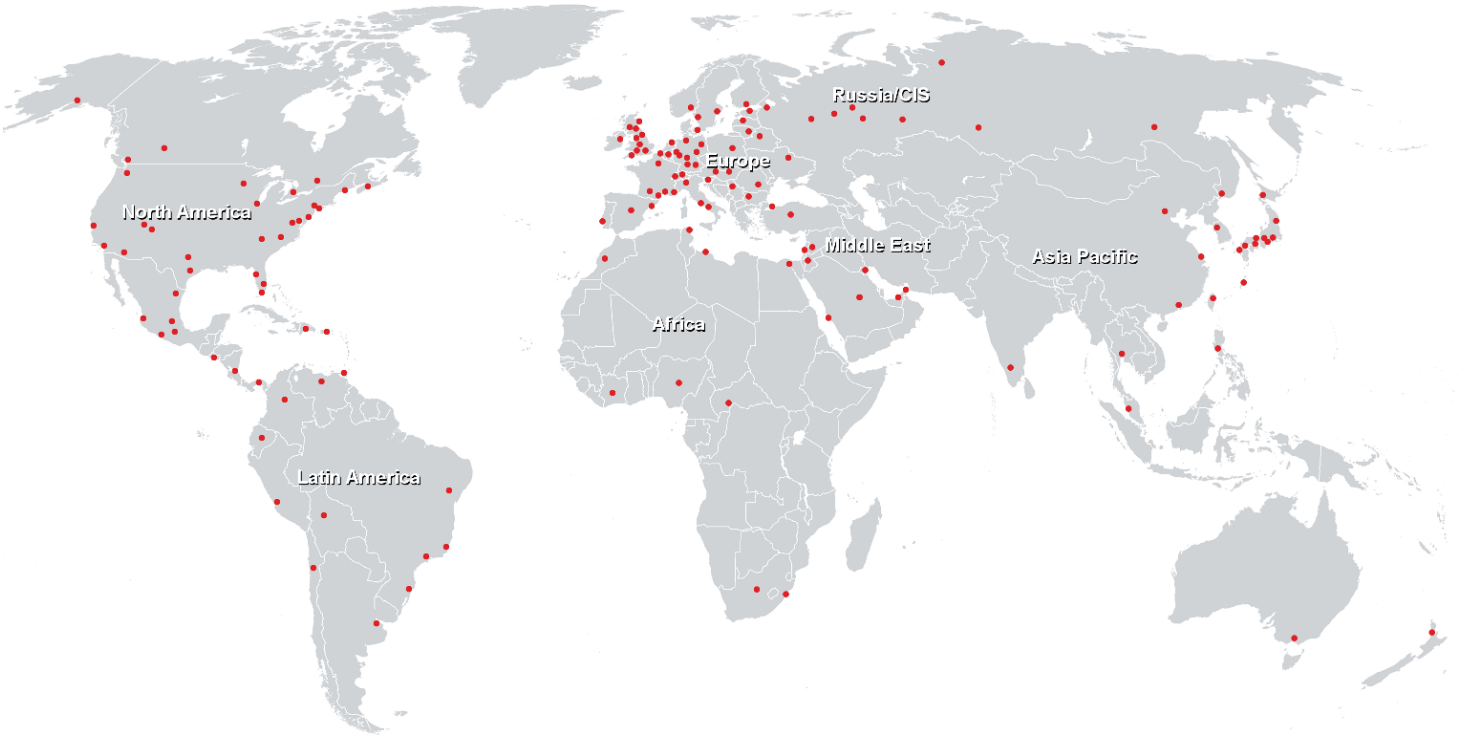

How can your organization benefit from cloud usage and become more sustainable through cloud services? Find out in this two-day ITIL 4 Specialist training. And from A to Z: The course deals with the procurement, implementation and ongoing assessment of cloud services without any attendance requirements - so that you can get started right from the start!

Cloud computing provides shared computer resources as services on demand, usually via the Internet and independent of devices, in a timely manner and with little effort. This can take the form of servers, data storage or applications, for example, and is billed according to use - a profitable opportunity for companies seeking flexibility, scalability and cost efficiency. But how can cloud technology be integrated into your business strategy? How do you analyze available solutions, optimize the selected services and maximize value creation through successful integration according to ITIL 4? Learn this and more in this hands-on training - vendor-neutral and user-centric.

You will internalize all content under the guidance of an experienced trainer and using the interactive Workbook Principle®. From initial approaches to cloud adoption, through requirements definitions and types of providers, to key elements of cloud strategy, security considerations and evaluation of existing solutions, all aspects, opportunities and risks of cloud adoption are explored in detail. This results in a holistic and customer-oriented adaptation of the Cloud Procurement User Journey. At the end of this ITIL 4 training "Acquiring & Managing Cloud Services" you will be excellently prepared for the subsequent certification exam - and ready for the next step in your organization!
