
Scrum Simulation 'Agile Park' (SSAP)

ID SSAP Price CHF 700.—(excl. VAT) **Duration** 1 day

Who should attend

This simulation is for managers, executives and employees of IT organizations, group leaders and all who work in interdisciplinary Scrum teams or have already participated in Scrum and/or SAFe trainings.

Prerequisites

You need no previous knowledge to participate in the simulation.

Course Objectives

Based on the inspiring vision, the participants create personas on behalf of employees, visitors and other requesters. On this basis, a user story map is developed and user stories are written together. The collected requirements are then divided into releases and sprints. The requirements are then implemented using the Scrum Framework with LEGO®.

After the simulation, you not only learned new best practices, but also applied them based on a defined scenario. These can now be applied to the following challenges:

- Define target groups
- Accept / create requirements
- Scrum Team setup
- Apply Scrum
- Release planning
- Definition of a minimum viable product

Course Content

The simulation is carried out in several thematic blocks in which you learn different best practices, each of which builds on the other. The following are included:

- Characteristics of a good product vision
- The importance of the product vision
- Creating personas as target group representatives

- Creating a user story map based on the defined personas
- Writing User Stories for the defined personas and based on the User Story Map
- Cutting the sum of requirements in Releases and Sprints
- The Scrum Framework in theory and practice
- Execution of the Scrum roles Product Owner, Scrum Master and Development Team Member
- experience how Scrum can create real business value
- increase the efficiency and effectiveness of the IT department
- improve the work flow of the different teams
- development of personal skills to work best in a Scrum environment
- identify opportunities and responsibilities for more successful IT projects
