

# Veritas InfoScale Availability 7.4.2 for UNIX/Linux: Administration (ISAUA)

### ID ISAUA Price on request Duration 5 days

#### Who should attend

This course is for UNIX/Linux system administrators, system engineers, technical support personnel, network/SAN administrators, and systems integration/development staff, who will be installing, operating, or integrating InfoScale Availability.

#### **Prerequisites**

Knowledge of and hands-on experience with UNIX/Linux systems administration is required.

#### **Course Objectives**

By the completion of this course, you will be able to:

- Describe how clustering is used to implement high availability in the data center environment.
- Describe VCS and cluster communication mechanisms.
- Create a cluster, and configure service groups and resources.
- Implement and verify failover and failback capability for application, storage, and network services.
- · Configure and optimize cluster behavior.
- Protect data in a shared storage environment.
- Describe I/O fencing operations, and its implementation.
- Configure VCS to manage an Oracle database and other applications.
- Describe InfoScale support for Cloud Environments.
- Configure and manage VCS clusters on virtual machines in VMware environment.
- Implement Just in Time Availability for single node VCS cluster on virtual machine in a VMware environment.

#### **Course Content**

#### **Cluster Server Basics**

- High Availability Concepts
- Installing and Licensing InfoScale
- VCS Building Blocks

- VCS Operations
- VCS Configuration Methods
- Preparing Services for VCS
- Online Configuration
- Offline Configuration
- Configuring Notification

#### **Cluster Server Additions**

- Handling Resource Faults
- Intelligent Monitoring Framework
- Cluster Communications

#### **Cluster Server Applications**

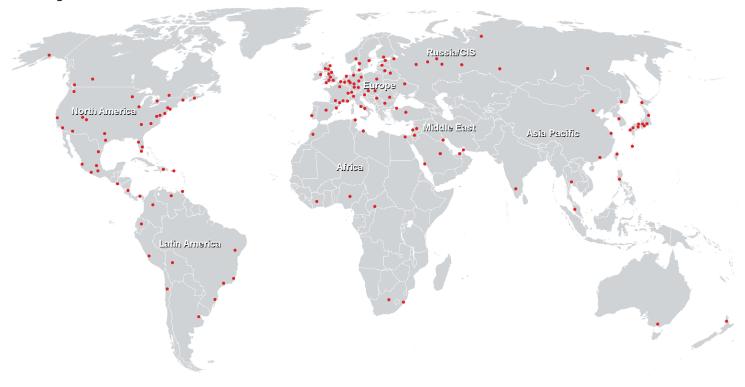

- Using I/O Fencing for Application Data Integrity
- Clustering Applications
- Clustering Databases

#### In-Guest Clustering

- InfoScale support for Cloud Environments
- VMware vSphere Data Center Architecture
- Veritas High Availability Deployment in VMware
- Veritas High Availability Configuration and Administration
