

CompTIA AutoOps+ (AUTOPS+)

ID AUTOPS+ Prix CHF 2 089,— (Hors Taxe) Durée 3 jours

Pré-requis

2–3 years of experience in a core IT operations role, such as a network, cloud, or systems administrator.

- Understanding AI Governance, Risk, and Compliance
- AutoOps in Practice
- Site Reliability Engineering (SRE) Essentials

Objectifs

CompTIA AutoOps+ validates your skills to automate, secure, and optimize IT operations across cloud and hybrid environments. This certification helps learners:

- Use scripting and automation to streamline IT workflows and manage enterprise systems efficiently.
- Automate configuration, provisioning, and maintenance using infrastructure-as-code and modern toolchains.
- Build and manage CI pipelines to automate testing, ensure quality, and improve collaboration between teams.
- Implement secure, compliant delivery pipelines that enable rapid, reliable deployment and operational efficiency.

AutoOps+ will develop your ability to design, implement, and manage automated IT operations across modern infrastructure environments. They will gain hands-on proficiency in scripting languages (such as Python, Bash, and PowerShell), infrastructure as code (IaC), and configuration management tools to automate system provisioning, maintenance, and troubleshooting.

Learners will also build and manage CI/CD pipelines, apply version control practices, and integrate APIs to streamline workflows. Additionally, they will learn to implement secure, compliant delivery processes, monitor system performance, and apply automation best practices to improve efficiency, scalability, and reliability across cloud and hybrid environments

Contenu

- Sumarizing System Configuration
- Understand Coding Concepts
- Use Version Control and Best Practices
- Automation and Orchestration Concepts
- Continuous Integration
