AI+ Agent Specialty™(AIA)

ID AIA **Prix** CHF 995,– (Hors Taxe) **Durée** 1 jours

A qui s'adresse cette formation

- Business Professionals Seeking AI Integration – Ideal for those looking to incorporate AI tools into everyday workflows.
- Tech and IT Practitioners – Suited for individuals aiming to expand their technical skill set with AI-driven capabilities.
- Data and Analytics Enthusiasts – Perfect for those interested in enhancing their analytical work with intelligent automation.
- Innovation and Strategy Leaders – Beneficial for professionals driving digital transformation and organizational innovation.
- Career Changers Entering AI – A strong fit for anyone transitioning into AI-focused roles and needing foundational, practical expertise.

Pré-requis

- Basic Understanding of AI Concepts – Familiarity with foundational AI principles and terminology.
- Programming Knowledge – Proficiency in Python or a similar programming language.
- Data Analysis Skills – Ability to interpret, clean, and manipulate datasets effectively.
- Problem-Solving Mindset – Strong analytical thinking to address AI-related challenges.
- Familiarity with Machine Learning – Understanding of common ML algorithms and techniques.

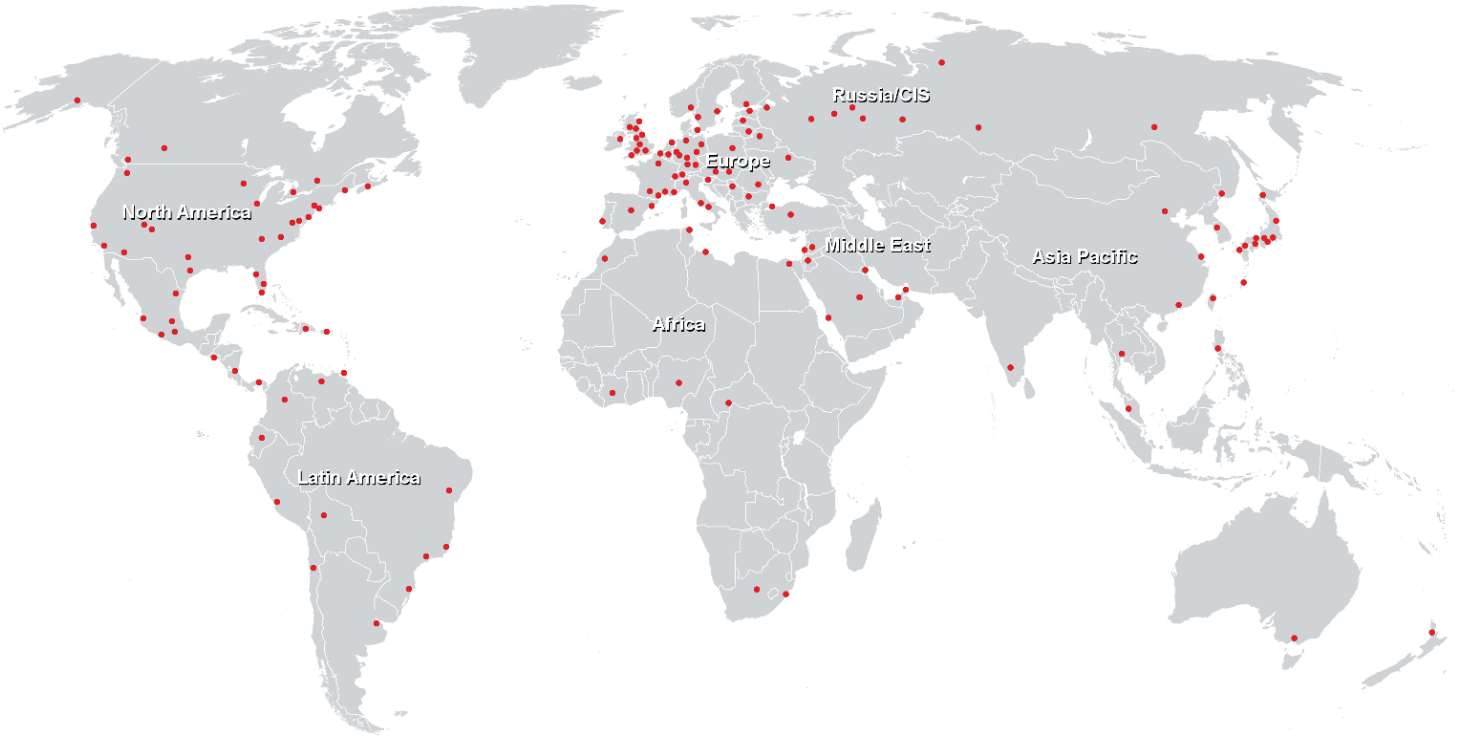

Objectifs

- Learn to Build Intelligent Agents – Develop a strong understanding of creating and deploying AI agents using no-code and low-code platforms.
- Grasp Real-World AI Applications – Apply agent-based solutions to practical use cases such as personal assistants, customer support, and sales automation.
- Develop Workflow & API Integration Skills – Gain hands-on experience integrating APIs, managing workflows, and connecting essential system components.
- Apply Responsible AI Principles – Understand and implement ethical, secure, and responsible AI practices throughout the agent-building process.
- Equip Yourself to Automate & Scale – Gain the capability to automate tasks, solve complex problems, and build scalable AI-driven systems across industries.

Contenu

- Introduction to AI Agents
- Core Concepts & Types of AI Agents
- Tools for Non-Coders
- Building Simple Agents
- AI Agent Builder
- Integration, Application Mapping & Deployment
- Monitoring, Guardrails & Responsible AI
- Capstone Project – Design Your Own
