Jira Space Administration (JSA)

ID JSA **Prix** sur demande **Durée** 2 jours

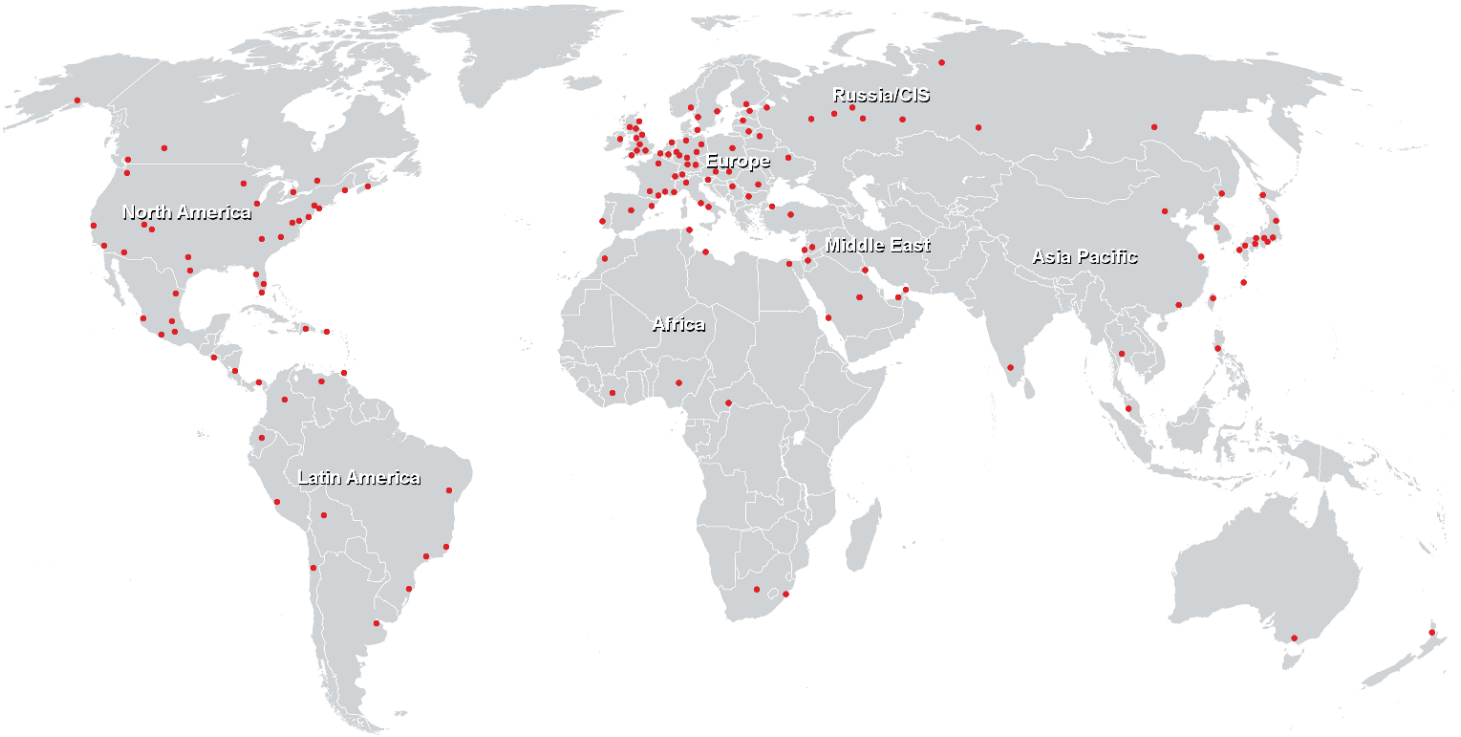

Contenu

This two-part training series equips participants with the knowledge and practical skills required to effectively administer and configure Jira spaces. Learners will gain an understanding of the Jira administration environment and learn how to configure space settings to align with team and project needs. The course covers managing space access and permissions to ensure the right users have the appropriate level of visibility and control within a Jira space.

Building on these administrative fundamentals, participants will explore how to optimize collaboration and work management within Jira. They will learn how to collect and manage information efficiently using forms, organize and release work through versions, and structure projects by grouping and tracking work with components. In addition, the training introduces Jira automation capabilities, enabling administrators to streamline recurring tasks, improve consistency, and increase overall team productivity. By the end of the training, attendees will be able to confidently manage Jira spaces, maintain effective governance, and support teams in delivering work more efficiently.
