

Check Point Certified Cloud Specialist (CCCS)

ID CCCS Prix sur demande Durée 2 jours

Pré-requis

- Check Point CCSA training/certification

Objectifs

After taking this course, you should be able to :

- Explain cloud network functions, service models, and deployment options.
 - Identify CloudGuard's primary components that protect cloud environments and datacenters.
 - Understand the key elements and basic concepts of the Secure Public Cloud Blueprint.
 - Describe the deployment options available for CloudGuard IaaS instances.
 - Recall the general troubleshooting resources and the misconfiguration issues that impact CloudGuard deployments.
 - Recognize the security policy layers and security object settings used in cloud security configurations.
 - Learn how to create an adaptive Security Policy with a cloud-context aware rulebase.
 - Understand the process of automating Security Policy enforcement on Security Gateways.
 - Recognize the types of cloud automation resources that support adaptive security protections.
 - Describe the cloud components and methods that support autoprovisioning CloudGuard instances.
 - Describe the Dome9 SaaS protections available for IaaS public cloud infrastructures.
 - Understand how to define users, build Security Policy, and configure system logging and alerts.
 - Learn how to control network security access within public cloud environments.
 - Identify the reports that find non-compliant cloud resources in public cloud accounts.
 - Know which tools provide automated remediations to non-compliant cloud resources.
 - Understand how to use cloud analytics to improve the visibility of a cloud account's security status.
- Understanding Cloud Fundamentals
 - Introducing CloudGuard Protections
 - Deploying CloudGuard
 - CloudGuard Security Policy
 - Automating CloudGuard Protections
 - Dome9 Security for IaaS Cloud Infrastructure
