Gigamon Foundation: Learn the Essentials to Start on the Road to Success (GFND)

ID GFND **Prix** CHF 1 995,– (Hors Taxe) **Durée** 2 jours

A qui s'adresse cette formation

- Security, networking and cloud architects, administrators and operations staff who are Gigamon customers but new to Gigamon products
- Gigamon partners who focus on security and networking and who are using Gigamon products for the first time

Pré-requis

Before attending this course, you should have an understanding of the following:

- Data security protection and prevention fundamentals
- Fundamentals of route switch technologies

Objectifs

After completing this course, you will understand:

- The different Gigamon product layers and how they function as part of a security solution
- How to plan for, and ultimately deploy, Gigamon products into your data center
- Different sources of traffic and how they impact your overall security solution
- How to install a new Gigamon GigaVUE® HC Series appliance into your network for the purpose of security monitoring
- How to create flow maps to help ensure that the right traffic gets to the right tool at the right time
- How to use GigaSMART features to improve your organization’s security posture

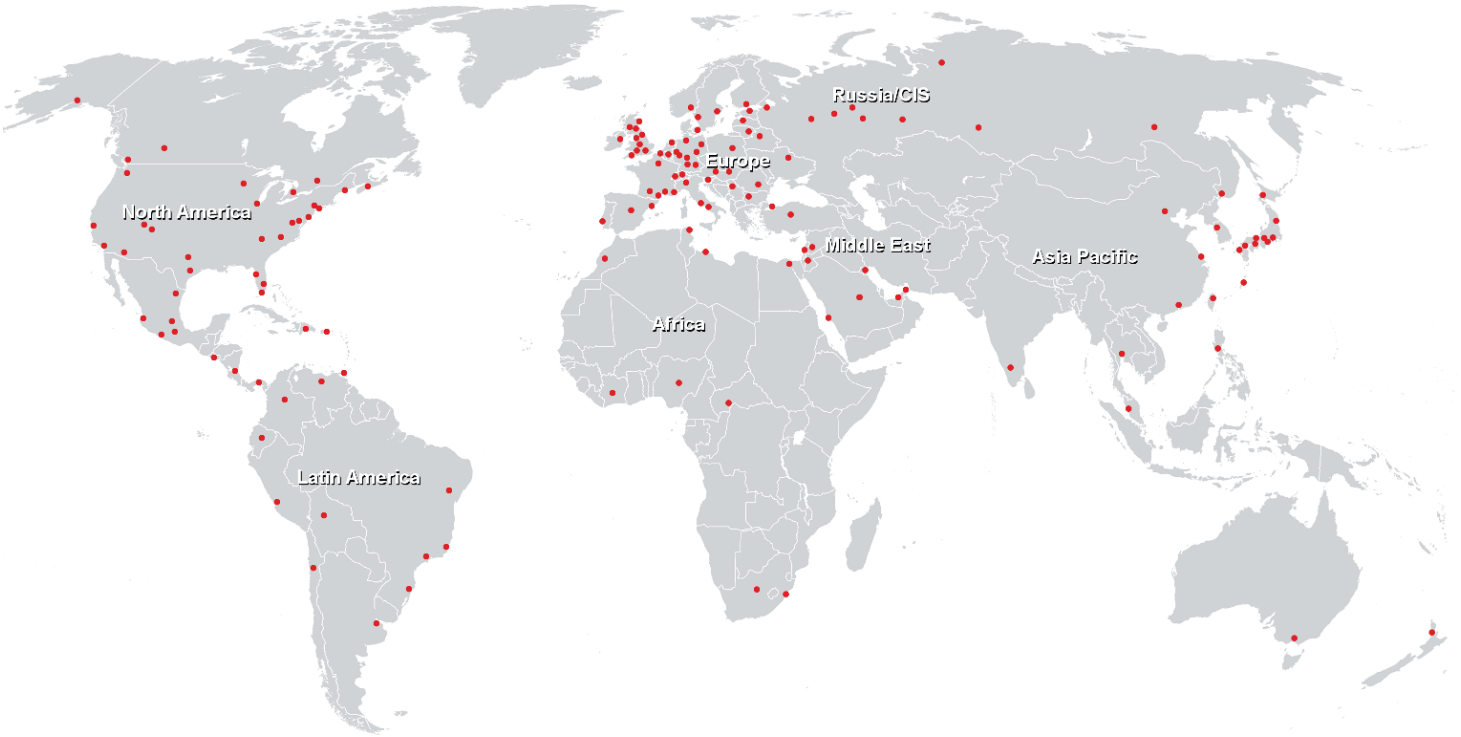

Contenu

This course includes approximately 15 hours of instruction time, hands-on labs and several discrete and sequential modules that walk you through the materials covered:

- Module 1: Gigamon Solution Overview
- Module 2: Deployment, Planning and Installation of Gigamon Solution Components
- Module 3: Understanding Traffic Sources
- Module 4: Preparing for a Gigamon Solution Deployment
- Module 5: Gigamon Solution Installation and Initial Configuration
- Module 6: Configuring Clustering
- Module 7: The Principles of Flow Mapping
- Module 8: GigaSMART Overview
