# Developing Applications with Cloud Run Functions on Google Cloud (DACFGC)

ID DACFGC Prix sur demande Durée 0,5 jours

## A qui s'adresse cette formation

- Partners and customers who want to learn about using Cloud Run functions and improve their application development skills on Google Cloud.

## Pré-requis

- Knowledge of Google Cloud console, gcloud CLI, and basic programming experience in Node.js or Python.
- Some understanding of other Google Cloud services that include Cloud Storage, and Pub/Sub.
- Understanding of HTTP, and experience with using HTTP client tools like curl.
- Completion of the [Google Cloud Fundamentals: Core Infrastructure \(GCF-CI\)](#) course is recommended.

## Objectifs

- Recognize the benefits of and use cases for Cloud Functions in modern application development.
- Understand how to build, test, and deploy Cloud Functions.
- Secure and connect Cloud Functions to resources, and cloud databases.
- Use best practices with Cloud Functions.
