
Develop Conversational Agents on Google Cloud (DCAGC)

ID DCAGC Prix sur demande Durée 3 jours

A qui s'adresse cette formation

- Conversational designers, developers, and business analysts.

Pré-requis

- Some familiarity with a graphical user interface for Conversational Agents will ease the learning process. Understanding JSON is helpful.

Objectifs

- Understand the different kinds of conversations available with an artificial intelligent (AI) agent.
- Design an AI agent for a deterministic intent-based domain.
- Understand how a user's request is translated into an action and response.
- Use webhooks to access data and products that are not part of the agent.
- Handle user errors and unexpected requests.
- Use the graphical user interface (GUI) to develop an agent.
- Gain a working knowledge of the testing tools available in the GUI.
- Integrate a chatbot into external user interfaces.
- Incorporate generative AI features into your agent.
