

IBM InfoSphere DataStage Essentials (v11.5) (KM204G)

ID KM204G **Prix** CHF 3 500,- (Hors Taxe) **Durée** 4 jours

A qui s'adresse cette formation

Project administrators and ETL developers responsible for data extraction and transformation using DataStage.

Pré-requis

- Basic knowledge of Windows operating system
- Familiarity with database access techniques

Contenu

This course enables the project administrators and ETL developers to acquire the skills necessary to develop parallel jobs in DataStage. The emphasis is on developers. Only administrative functions that are relevant to DataStage developers are fully discussed. Students will learn to create parallel jobs that access sequential and relational data and combine and transform the data using functions and other job components.

- 1. Introduction to DataStage
- 2. Deployment
- 3. DataStage Administration
- 4. Work with Metadata
- 5. Create Parallel Jobs
- 6. Access Sequential Data
- 7. Partitioning and Collecting Algorithms
- 8. Combine Data
- 9. Group Processing Stages
- 10. Transformer Stage
- 11. Repository Functions
- 12. Work with Relational Data
- 13. Control Jobs
