Certification requirements:

- For the certificate, each participant must state their professional experience in endorsement, based on the ISC2 domains.
- You must have at least five years of professional experience in IT, of which at least 3 years in the field of information security, of which at least 1 year of experience in one or more of the six domains of the CCSP Common Body of Knowledge (CBK)
- With the ISC2 CISSP certification, you automatically meet all the requirements.

CCSP (Certified Cloud Security Professional): The premier cloud

security certification. One of the hottest certifications on the market today. The CCSP recognizes IT and information security leaders who have the knowledge and competency to apply best practices to cloud security architecture, design, operations and service orchestration.

Objectifs

ISC2 developed the Certified Cloud Security Professional (CCSP) credential to ensure that cloud security professionals have the required knowledge, skills, and abilities in cloud security design, implementation, architecture, operations, controls, and compliance with regulatory frameworks. A CCSP applies information security expertise to a cloud computing environment and demonstrates competence in cloud security architecture, design, operations, and service orchestration. This professional competence is measured against a globally recognized body of knowledge.
