

## Building Al-Based Cybersecurity Pipelines (BABCP)

ID BABCP Prix sur demande Durée 1 jour

## Pré-requis

- Familiarity with defensive cybersecurity themes
- Professional data science and/or data analysis experience
- Competency with the Python programming language
- Competency with the Linux command line

## **Objectifs**

- Build Morpheus pipelines to process and perform Al-based inference on massive amounts of data for cybersecurity use cases in real time
- Utilize several AI models with a variety of data input types for tasks like sensitive information detection, anomalous behavior profiling, and digital fingerprinting
- Leverage key components of the Morpheus AI framework, including the Morpheus SDK and command-line interface (CLI), and NVIDIA Triton™ Inference Server
