Licensing in virtualized Infrastructures (Practise with Office 365, M365 and Azure) (DTL-MOC55188)

ID DTL-MOC55188 **Prix** CHF 2 115,– (Hors Taxe) **Durée** 3 jours

A qui s'adresse cette formation

Persons responsible for purchasing software licenses or responsible for software asset management / software license management in companies; IT staff, IT professionals, IT managers, cloud and data center administrators.

Pré-requis

Technical understanding, basic knowledge of licensing law.

Objectifs

After attending this course, you will know the pitfalls of licensing scenarios in the areas of cloud, outsourcing and virtualization. You will be able to safely navigate the cloud portals of Microsoft solutions and manage licenses and services. They will also get answers and suggested solutions for licensing in your cloud and virtualization scenarios.

- Your added value as a license manager:
- Find your way around the portals better.
- Better understand technical issues that impact costs.
- Learn to avoid getting invoices that were not budgeted.
- Your added value as a technical manager:
- Get an idea of how you can set up release processes.
- Identify which changes have influences on costs.
- Learn what info the license manager needs to ensure compliance.

Contenu

Day 1

- Module 1: Technical basics
- Module 2: Fundamentals of Virtualization and Cloud
- Module 3: Licensing Virtual Server Environments
- Module 4: Licensing of Windows Clients
- You will practically apply what you have learned in practice examples.

Day 2

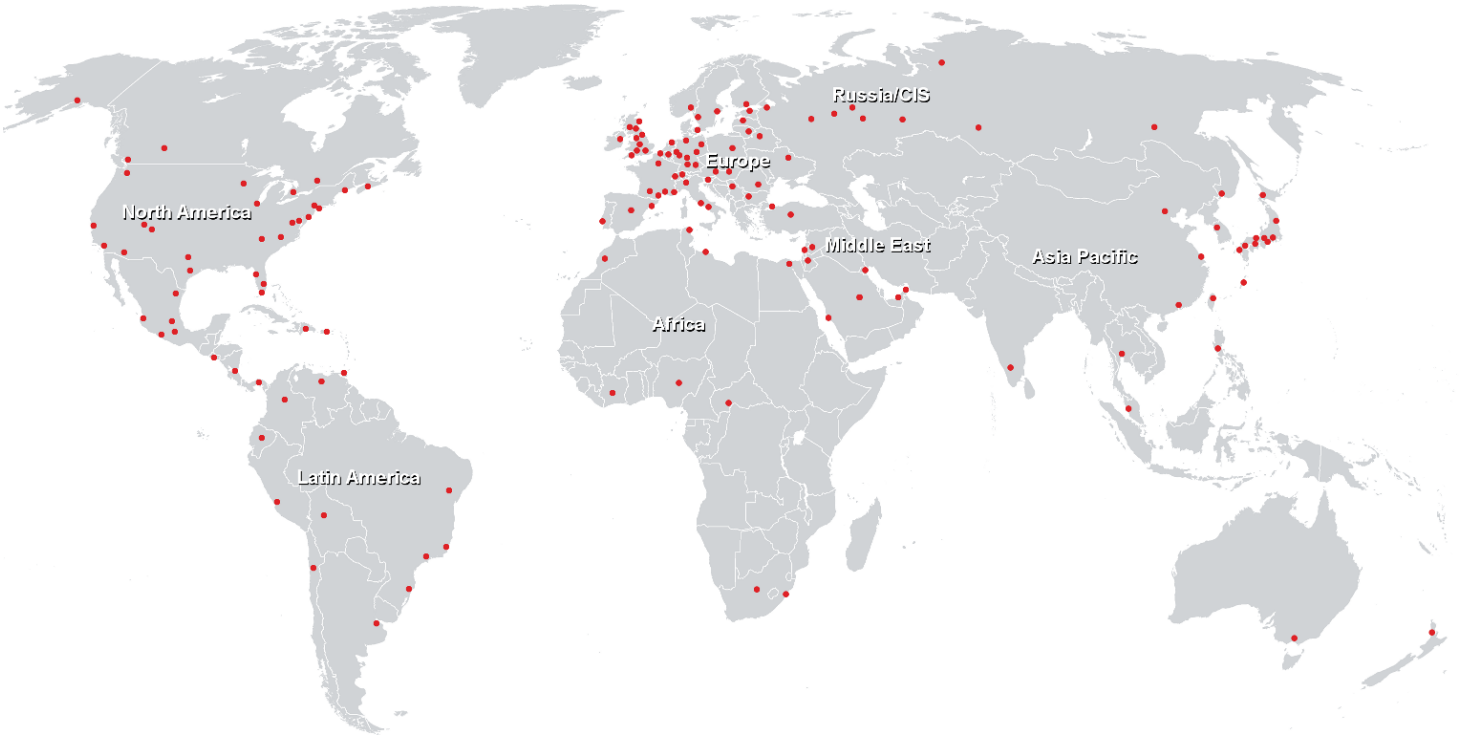

- Module 5: Azure and Microsoft 365 Licensing
- Module 6: Technical Basics for Licensing and Managing Office 365
- With your test account, you can try out the scenarios live in the course in the Office 365 portal. Furthermore, you will learn about the interrelationships and interactions between IT and licensing in Office 365.
- A special feature of this day is that 2 trainers (a licensing trainer and a technical trainer) are available and thus licensing issues and technical aspects can be highlighted "stereo".

Day 3

- Module 7: Technical Foundations for Azure Licensing and Management
- With your test account, you will see how to make settings in the Azure Portal and learn how to set up virtual machines in Azure, for example. Here, too, we go into the dependencies between technology and licensing.
