

Using Splunk Application Performance Monitoring (USAPM)

ID USAPM Prix sur demande Durée 4,5 heures

A qui s'adresse cette formation

Developers and DevOps

Pré-requis

To be successful, students should have a solid understanding of the following:

Required:

- Familiarity with navigating Splunk Observability Cloud

Strongly Recommended:

- Basic knowledge of visualization and alerting on metrics in Splunk Observability

Objectifs

- When to use Splunk APM
- View and Analyze End-to-end Collected Traces
- Find the Root Cause of a Problem

Contenu

This 4.5-hour virtual course targeted to Developers and DevOps enables you to use Splunk APM to analyze traces, troubleshoot and monitor your microservices-based applications. Through discussions and hands-on activities, deep dive into uses of distributed tracing, navigating the Splunk APM app to analyze traces and visualize and alert on APM metrics.
